INTERMEDIATE/ADVANCED

*PSYCHOLOGISTS, BBS, NBCC, MCLE (also meets Child Custody Evaluators requirements)

Mental health professionals in the role of child custody evaluators sometimes recommend that abused children or those exposed to family violence be placed by family court judges into the custody of the alleged abusers. This surprising outcome in courts nationally and internationally seems to occur based upon a variety of repeated errors that are often made in these cases. The presenters will provide examples of these types of errors, from mental health as well as legal perspectives. Case examples from around the country that describe how well-meaning people are often led into the decision not to protect children are presented.

25. Working with African American Men Who are Violent

Oliver Williams, Ph.D., and John Rich, M.D.

BEGINNING/INTERMEDIATE

* PSYCHOLOGISTS, BBS, NBCC, DVOTP - Multicultural

This workshop explores the issue of community, acquaintance, and intimate partner violence among low-income African American men. The presenters provide an overview of the issue of violence among young African American men who live in low-income, high stress community environments. Ellen P. Lacter, Ph.D., and Mary Battles, M.A.

A step-by-step approach is presented, through case studies, including provider preparation, accommodations for the individual with a disability, ADA requirements for both private practice and agency mental health providers, communication issues, issues of mental health of the victim, use of interpreters, communication technologies, inclusion of the family in treatment, team approach to treatment and the interventions used in therapy.

Alan Rosenbaum, Ph.D., & Alyce LaViolette, M.S.

INTERMEDIATE

*PSYCHOLOGISTS, BBS, NBCC, DVOTP - Group Dynamics-Treatment

In this workshop, various models of intimate partner violence (IPV) intervention are explored. The focus is on the contributions that each make to our understanding the different facets of IPV. The treatment implications of these models and the strategies they suggest are discussed. Participants are encouraged to broaden their perspectives on batterers and batterer intervention. A year-long non-curriculum based program with a process oriented approach is also discussed. Although specific strategies of the programs are presented, the objective is "creative brainstorming" regarding methods of moving batterers toward the goals suggested by the models.

Because healthcare settings are often high stress, they are ripe for incidents of violence. This presentation will focus on three different healthcare settings and the different forms that workplace violence may take in each setting.
